

About COVID-19 Infections

- ◎If you have symptoms such as a fever and would like to go to the hospital, **first consult with your primary care physician by phone.**
- ◎If you are a resident of Gifu City and do not know a doctor to consult with, you can call the **Gifu City Public Health Center (weekdays 9am – 5pm) at 058-252-0393.** You can also call the **Gifu Prefecture Medical Consultation Advising Center** during Saturdays, Sundays, and public holidays. During weekdays, they are available from 5pm-9am at **058-272-8860.**
- ◎Gifu Prefecture COVID-19 Foreign Language Consultation Center: 058-263-8066

How COVID-19 Infections Have Spread

(Examples)

- ① **Serving alcohol in a nightclub while not wearing a mask**
 - ▶ **12 people infected, including customers**
- ② **Family members gathering and eating a meal together while not wearing masks**
 - ▶ **Nine people infected, including eight people from three different families and one of their friends**

(Beware of the following risks!)

- Talking while not wearing a mask (bad!) and talking while eating (bad!) increase the risk of infection
- Drinking alcohol can cause you to get louder (bad!) and/or chat more (bad!) which makes it easier for people to get infected!

(Be sure to follow these tips!)

- Avoid meeting others regardless of the time of day when unnecessary
- Avoid going out if you do not feel well

★If you are infected, you must stay at a hospital or recuperation facility until you recover

We all need to work together to

**prevent infections through
masks, hand washing, and social distancing!**
